

The Redi-Rock logo consists of the words "REDI+ROCK" in a white, bold, sans-serif font, centered within a red square. The plus sign is a simple horizontal line.A large, curved retaining wall made of stacked, rectangular stone blocks with a weathered, textured surface. The wall is set against a backdrop of a grassy field and a cloudy sky.

Created from architectural-grade, wetcast concrete, Kingstone blocks provide an aesthetically pleasing and structurally sound solution.

A close-up photograph of several stacked stone blocks, showing their irregular, weathered texture and light tan color. The blocks are arranged in a staggered pattern.

REDI-ROCK TEXTURE:

KINGSTONE

A photograph of a stone wall in a grassy field. The wall is made of large, rectangular blocks with a weathered texture. The background shows a blue sky with white clouds and a green field.

Striking a balance between the grandiose scale of Limestone and rugged relief of Ledgestone, the Kingstone texture appears weathered by water and time like the crown of a natural stone outcropping. With each Redi-Rock block looking like a large, quarried stone, Kingstone will transform retaining walls into castle-worthy walls.
